

Healthcare Security System Installer/Technician Job Description

General Overview:

TotalKare of America, Inc., a medical equipment distributorship located in Syracuse, New York, is looking for an installer/technician of security systems designed for the healthcare industry. Extensive travel is required with this position as we cover a large territory to include New York and New England.

Qualifications:

Associates or Bachelor's Degree in electronics or equivalent technical training (such as ITT Technical Training Institute or any other armed services electronics training).

Must possess:

- A valid NYS driver's license
- Basic relay/contact/terminations and testing experience
- Wiring experience to include: basic electrical, low voltage, and CAT-5
- Computer hardware & software skills (programming of system components)
- A working knowledge of various types of security/video systems
- Technical Trade School (VoTech) experience
- The ability to interpret and apply blueprints, plans, CAD drawings, and specs
- The ability to program access control systems and program changes to monitored systems
- The ability to install healthcare security & access control systems and hardware

Qualified candidates must have a commitment to excellence and be flexible, willing to travel for extensive periods of time, be self-motivated, organized, have good communication skills, be able to take direction, work as a team player and be ready to perform any function deemed necessary for the accomplishment of the objectives of TotalKare.

Salary/Benefits: *\$15/hr. to start, plus time and a half for overtime. TKA provides company vehicle, pays for expenses on the road, contributes towards health, dental and 401K plan.*
