

## Central Monitoring Station

The fully redundant Central Monitoring Station is the heart of the community resident safety system. The Station receives alarms and information through the resident safety back-bone from wireless help, check-in and community monitoring transmitters. All information is recorded and staff is notified, when appropriate, through pagers or staff phones.

The Station consists of the SmartCare Resident Safety monitoring application, a Central Alarm Receiver, Uninterruptible Power Supply, Report Printer and interfaces to community alarm / fire panels.

The Central Alarm Receiver is a highly-reliable, alarm-processing and backbone monitoring device. The Receiver is in constant communication with the SmartCare PC to assure staff notification of community events.

### Key Components and Features

- SmartCare Monitoring Application
- Central Alarm Receiver
- Report Printer
- Monitoring Station PC with 17" flat panel display and second hard drive for automatic back-up
- Uninterruptible Power Supply
- Available Options:
  - Network Monitoring
  - Staff Communications – Pager or Spectralink phone
  - Alarm / Fire Panel Interface
